to be Telstar Rebels

What does it mean to be a Telstar Rebel?

Being a Telstar Rebel is part of a decades long tradition that has seen thousands of area students take on new self-designed challenges in order to move on and establish successful pathways to the future upon graduating. These challenges can be athletic, academic or goals that focus on another aspect of personal growth. As the school looks towards celebrating its 50th anniversary next year, the Class of 2018 can be proud of the way they have challenged themselves and others around them to move out of their comfort zones and strive to take on new challenges by recognizing their own unique abilities. Being a Rebel involves the ability to question the norm. That is true not only from a societal perspective but from a personal point of view as well. Telstar Rebels succeed best when they refuse to accept limitations that are set for them and refuse to limit their own dreams and ambitions based on what others may feel they are capable of achieving. Deep down inside each of us, we all need to recognize that we are capable of attaining more than we might originally expect of ourselves. Once students recognize this and refuse to accept such limitations, they can validate that they have truly earned the right to be recognized as a "Telstar Rebel"!

-David W. Murphy, Ed.D
Superintendent of Schools

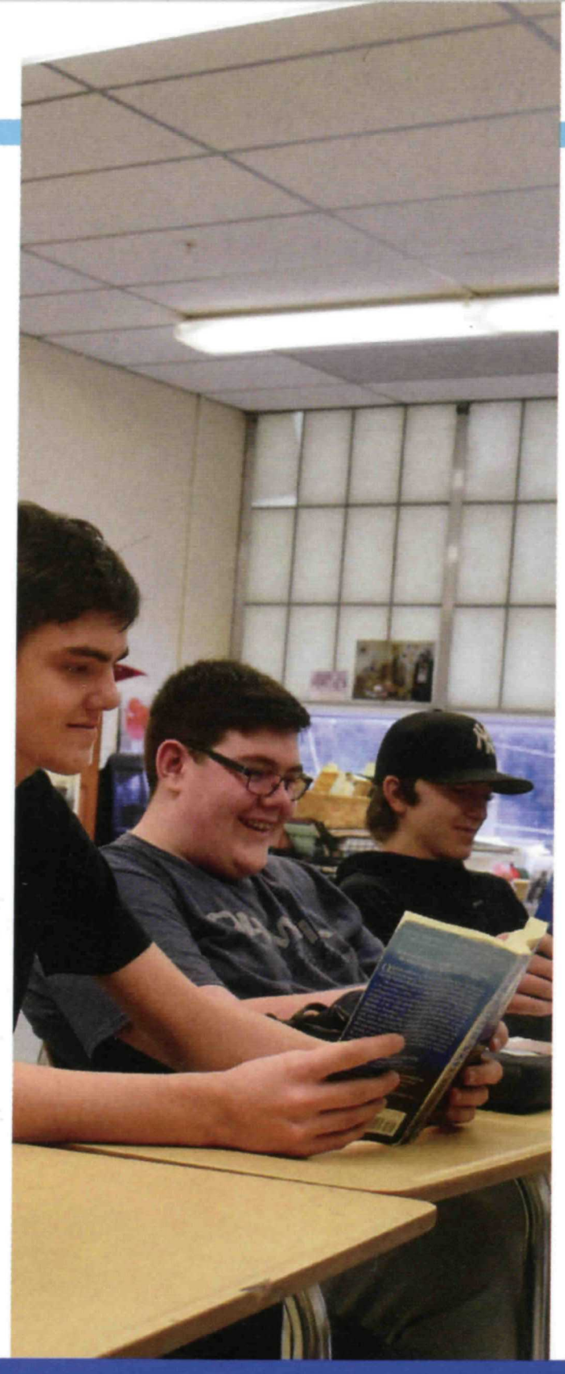

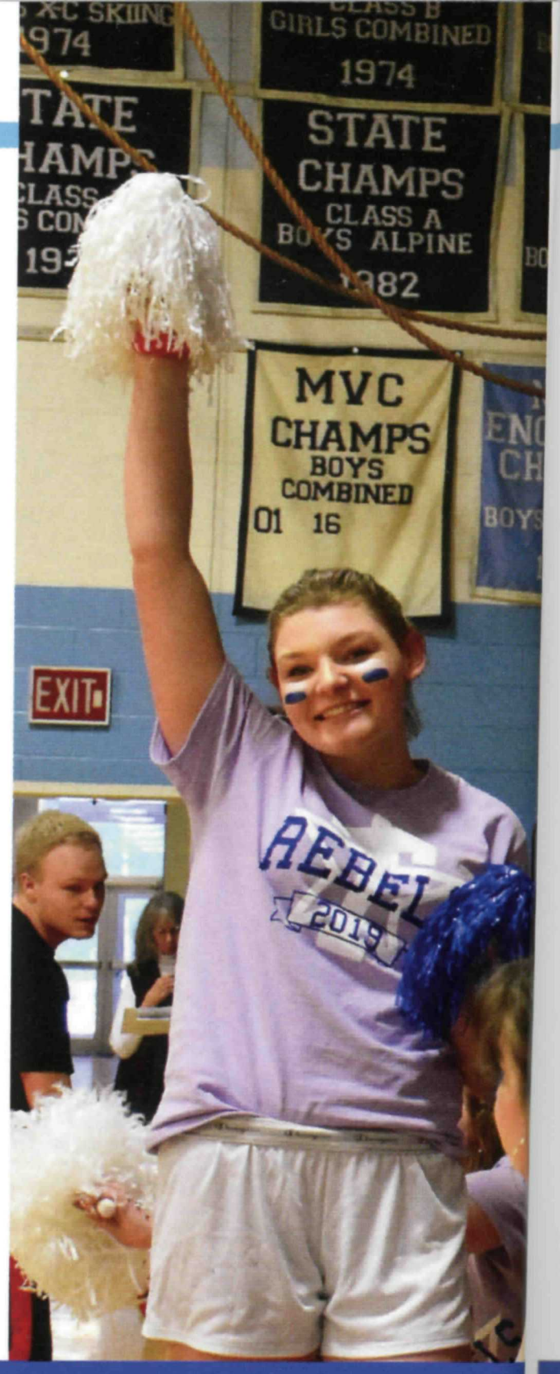

To be a Telstar Rebel means that you have a tremendous amount of pride in your school, your teachers, and all of the opportunities that have been afforded you along your high school career. Students are an integral part of what makes Telstar High School a place that they can be proud of. Show your Rebel Pride by being actively and positively involved in your school academics, athletics, co-curricular, and extra-curricular activities. There are ways that everyone can find a way, and being a Telstar Rebel means being involved.

This Classroom Suits Us

Each classroom at Telstar High School suits the teacher to a T!

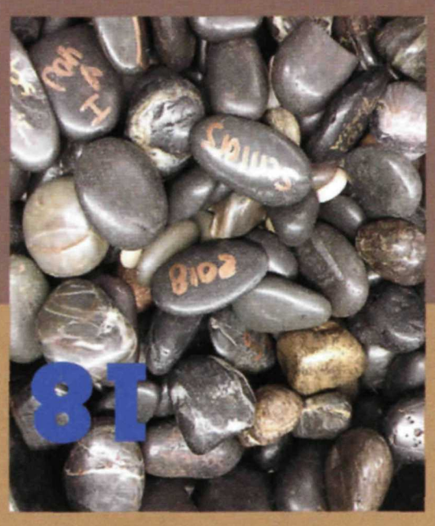

Every teacher at Telstar High School has something unique about their classroom. If you think about it, our teachers spend a lot of time in these rooms and the space reflects a little bit about them.

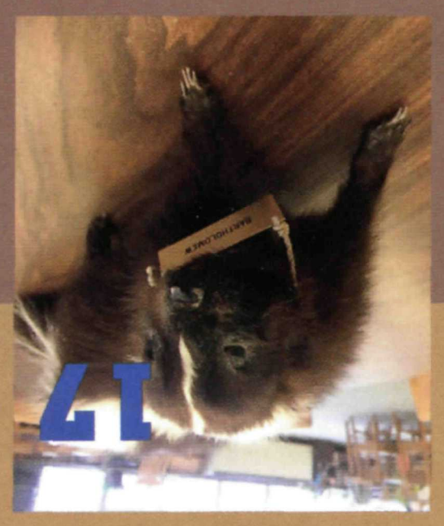

The personality of each teacher is expressed by the arrangement of desks, the decorations on the walls, and objects on their desks.

In some classrooms you will find cardboard cut-outs propped on the shelves, collages of old photographs, books piled on top of each other and maybe a Keurig station set up for you to use.

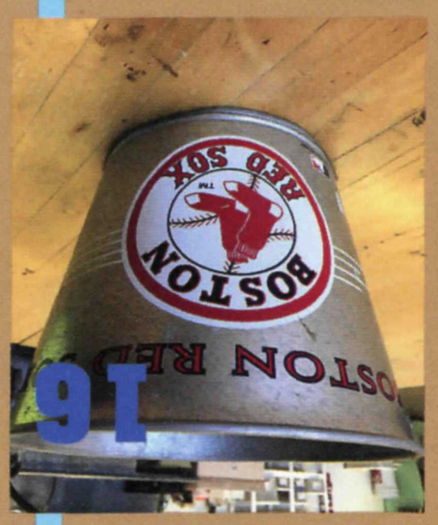

Key:1- Mr.Eliot,2-Mr.Leclerc,3-Mr.Kean,4-Ms.Ingraham,5-Mr.O'Connor,6-Ms.Fraser(library),7-Mrs.Bennett,8-Mrs.Blauss-,9-Office,10-Ms.Colpitts,11-Mrs.Hutchinson,12-Mrs.Fraser,13-Mr.Haines,14-Mrs.Southam,15-Senora Ojeda,16-Mrs.Forman,17-Mr.Raymond,18-Dr.Poston

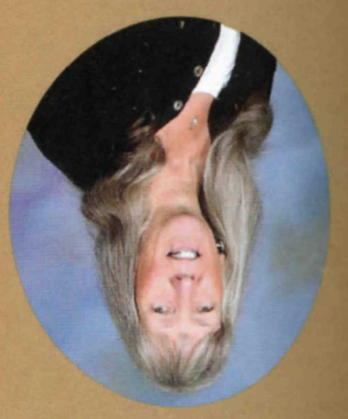

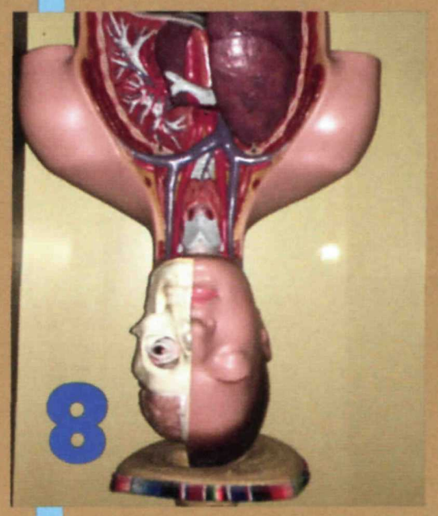

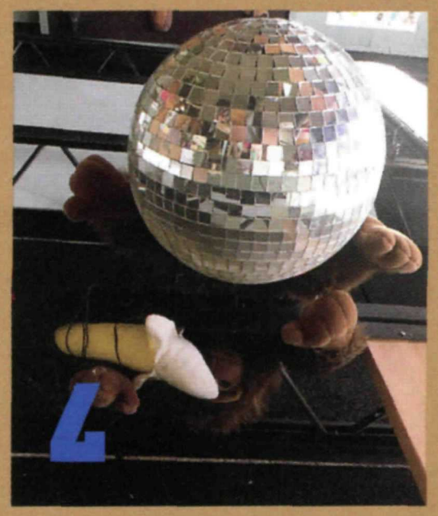

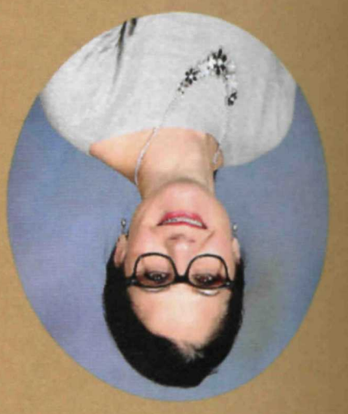

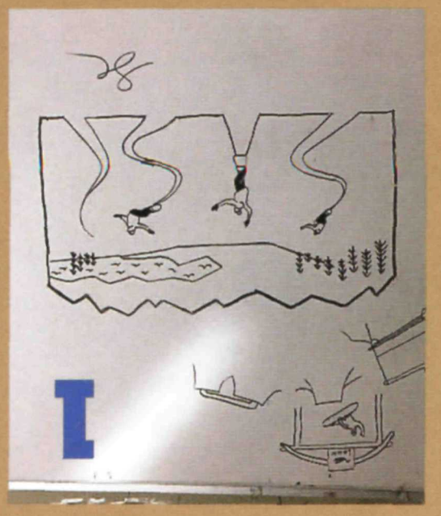

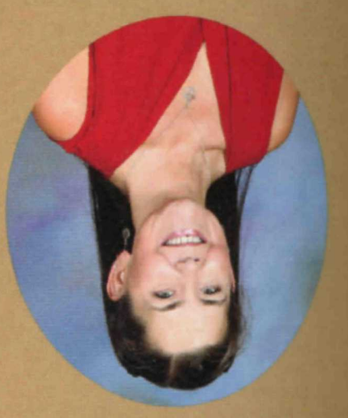

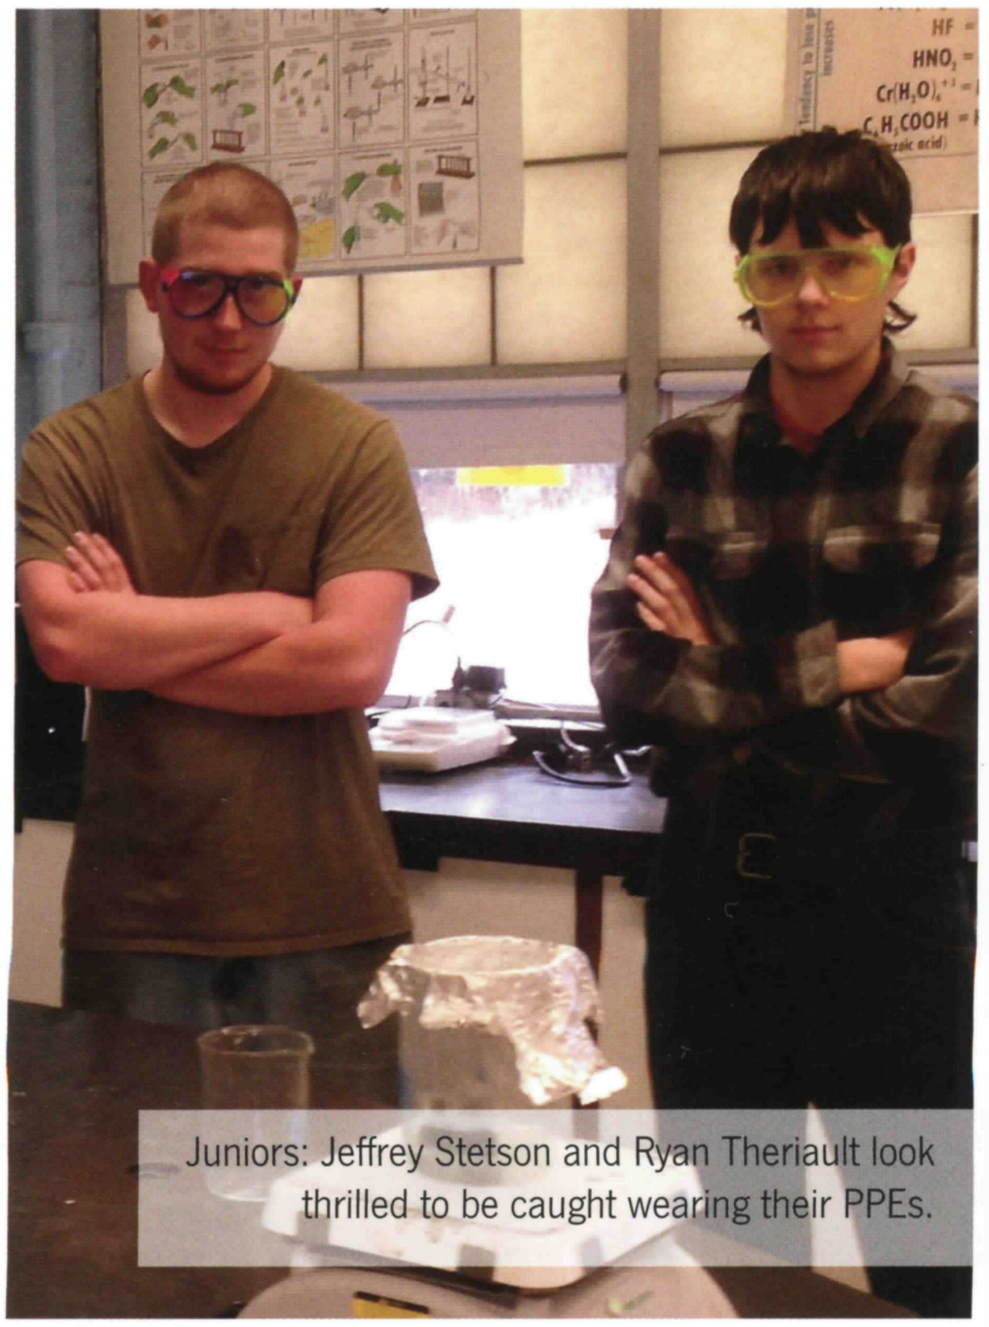

Match the teachers face to the object that makes their room unique.

Are you wearing the proper **PPE?**

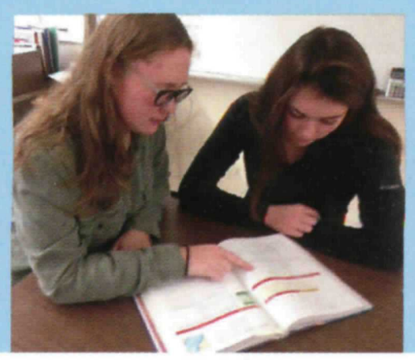

Juniors: Bryce Koskela, Alexis Sing and Georgia Piawlock pause for a picture wearing their stylish glasses.

Juniors: Jeffrey Stetson and Ryan Theriault look thrilled to be caught wearing their PPEs.

What is the hardest Math concept? Students share that math struggles are real!

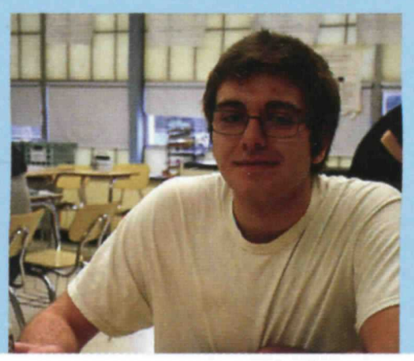

"Geometry proofs."
- Emily Fraser and Luci Rothwell, Sophomores

"Imaginary numbers. They aren't hard, just tedious and not really that fun."
-Evan Leconey, Sophomore

"Everything about math is hard and it makes no sense, but here I am calling myself a mathlete"
-Olguine Lane, Sophomore

"Trigonometry, because I haven't learned it yet, but I want to."
Matt Morin, Senior

Solving Problems

Math and Sciene Play Well Together

Math and Scince are equally important. From our research we have found many similarities and differences. They are clearly not the same thing but science works when it has mathematics, and science creates mathematics or at least, it creates the problems that mathematics help solve.

Math plays a large role in our lives even if some of us don't like it very much. To many students, math is a bunch of random skills to memorize and regurgitate, a series of steps witn no meaning or relevance to their lives. Math is much more than that. Math people like it's clarity and the satisfaction of knowing when you have the right answer to a problem. Mathematics is the science that deals with lthe ogic of shape, quanity and arrangement. Really....Math is all around us, in everything we do.

Science is pretty awesome! It is the study of how the structure and behavior of the physical and natural world work. This subject helps us to better understand the world around us. Not only does science allow us to conduct some really cool experiements it also helps us develop skills of planning and conducting investigations, ways to gather information, work with others, and evaluate our findings.

When all is said and done, it is really cool how Math and Science work together. Math can reveal and relate what scientists discover by helping them find relationships between an experiment's hypothesis and the data that is collected. By using statistics, scientists can use data as evidence to either support or dispute their original theories.

Russell Cushman looks on as Bethany Laird and Tristen Lilly conduct an experiment in Chemistry. Gabe Pasternak looks like he is about to dance!

Watch or Read?

Sometimes the book just doesn't translate to the big screen. English students share their favorite book and if it should just be read or watched.

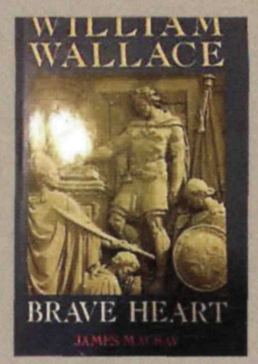

"I liked how George took care of Lennie during the book."
-Rebecca Morin

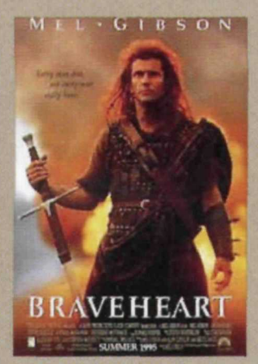

"The Chirstmas Carole movie because its just better."
-Blake Rothwell.

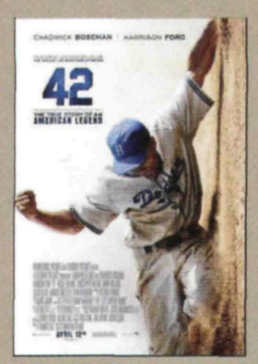

"I liked how the book had more scenes than the movie."
-Aaron Vermette

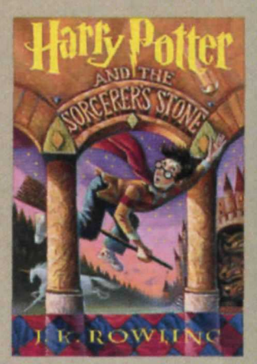

"Because of Mel Gibson portrayal of William Wallace."
-Connor Landes

"The movie tells more than the book."
-Rider Gross

"I like the Harry Potter books better, because the books give more detail."

Book

Who says you have to be in Social Studies to read about history and who says you have to be in English to read anything? We asked Telstar students to share their favorite historical book.

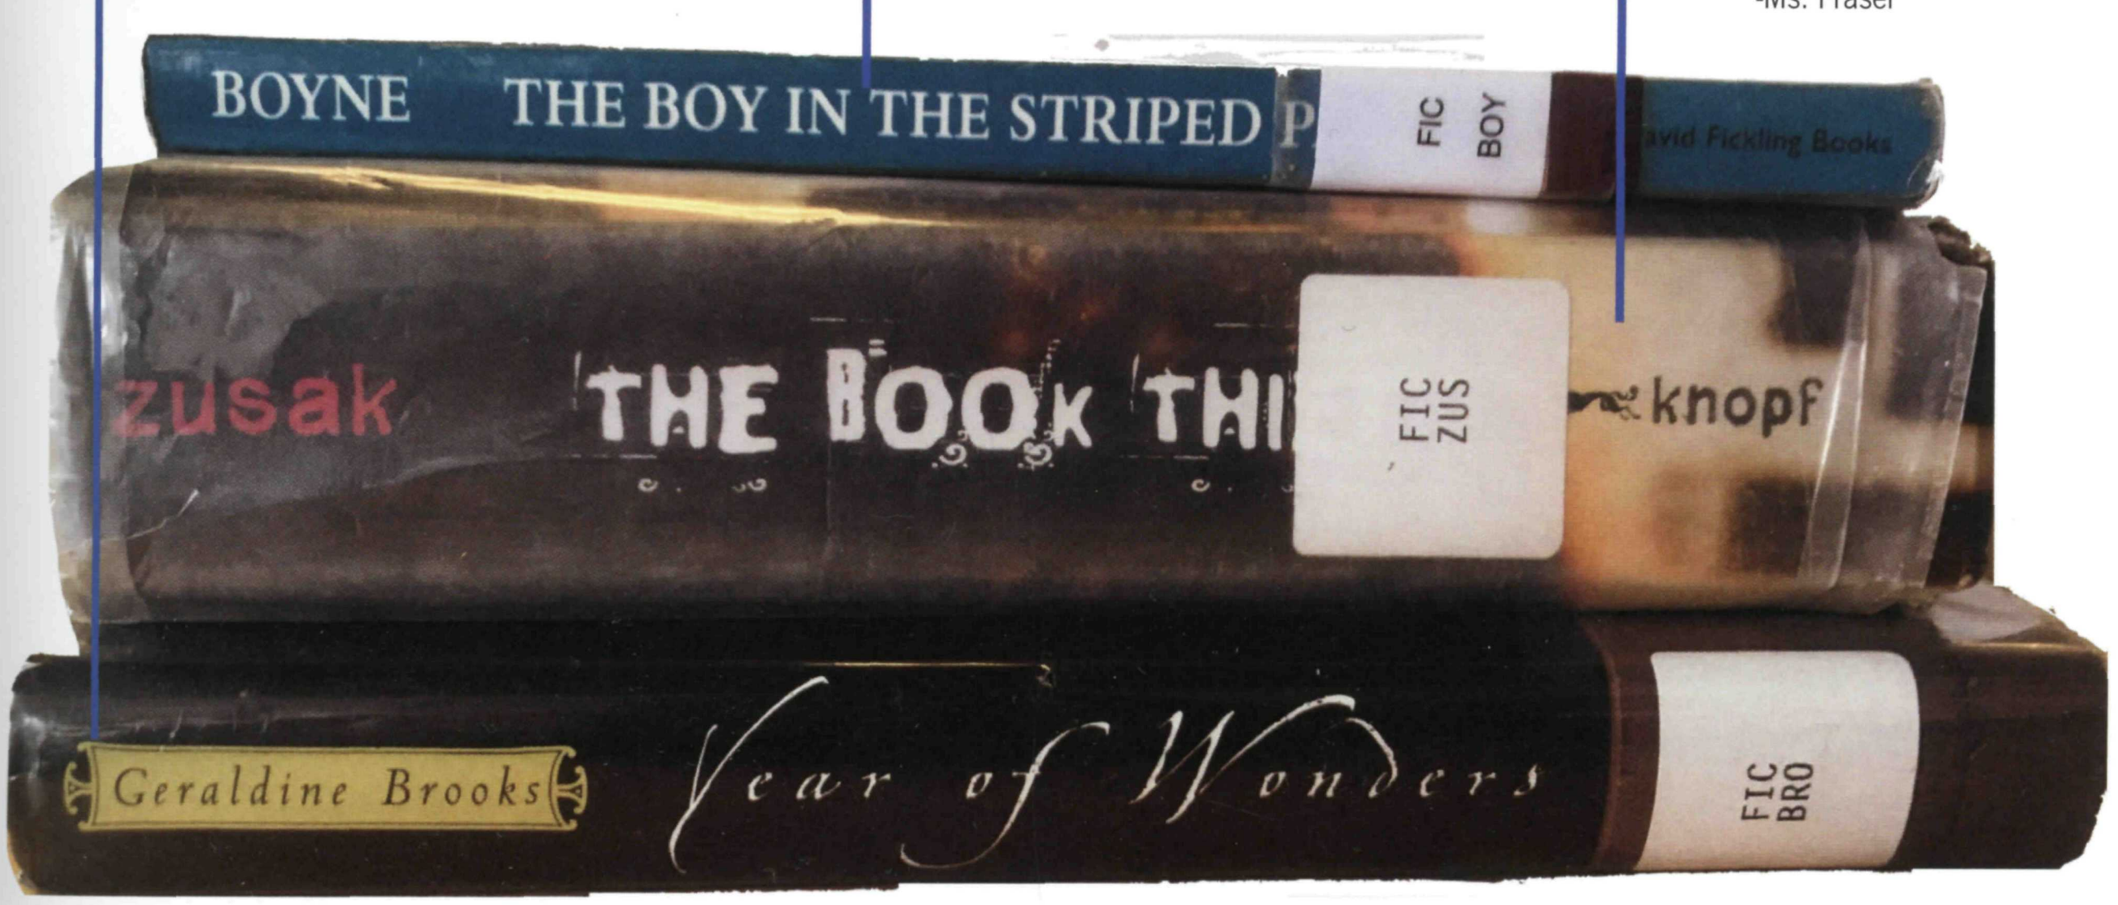

"The Boy in the Striped Pajammas was my favorite. It kept interested because I wanted to know what was going to happen next."
-Caleb Merrill

"Years of Wonder was good because it was more than just a factual book, it had a story to connect to."
-Alivia Chappie

"The Book Thief is set in Nazi Germany during WWII. Markus Zusak's book is subtly written with Death as a character. When I read this book, it gave me hope. If a girl in the midst of horrific conditions such as the Holocaust can remain hopeful, I can."
-Ms. Fraser

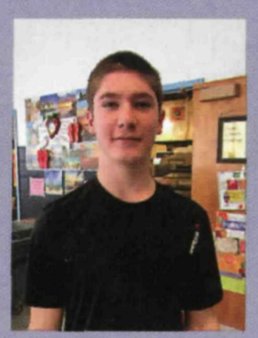

Whats your favorite historical era?

Students can be drawn to a certain point of history, it could be for its art, music, events or just for the the lifestyle. History students point out their favorite time in history and why they picked it.

What is Homecoming all about?

Homecoming means tradition. Every year Telstar Rebels look forward to showing their pride by creating class banners, cheering the loudest and participating in the parade.

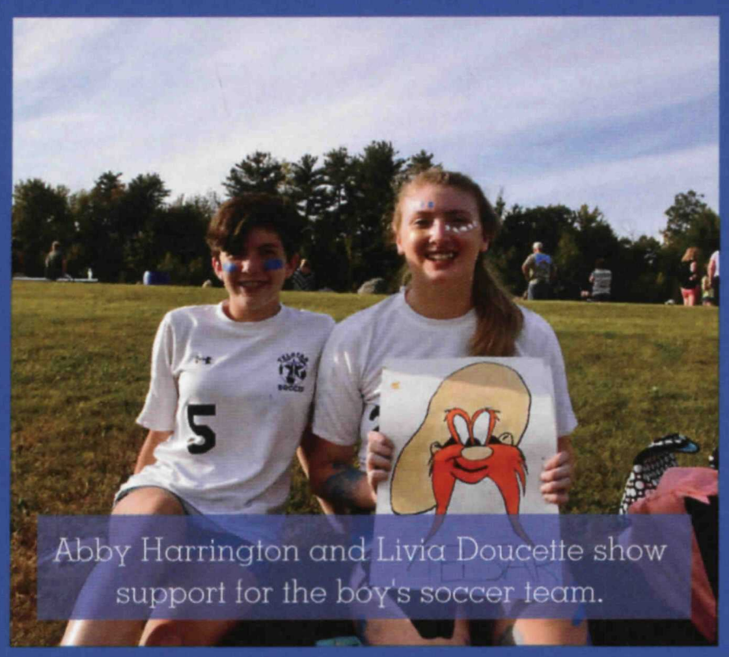

This year we filled the bleachers in the gym and watched as class members competed in various activties. Hungry Hippos returned by popular demand and Ms. Ingraham surprised everyone with a new event called the Chariot Races.

The Community Night on the Common was successful with a parade, yummy food sold by the classes, and pumpkin carving!

We ended the week with our Dance! We dressed our best and danced the night away under the twinkle lights.

Junior class wins 3rd place for banner competition.

Abby Harrington and Livia Doucette show support for the boy's soccer team.

1st place winner of pie eating contest, Matthew Rice.

20 minute pumpkin carving contest, results in interesting pumpkins.

Sportsmanship is Strong with this Group

Telstar returned its entire team from 2016. Russell Cushman is a four-year player and the Rebels' No. 1 player. He was looking to qualify as an individual for the state championship. Colby Marriott and Toby Walker built off their sophomore campaigns and provided competition as the second and third spots on the team. Coach Lunney believed the team was competitive this season.

1,000 Points

Senior, Jarrett Bean joins Telstar's 1,000 point club

For a high school basketball player, scoring 1,000 career points is the ultimate goal and Jarrett Bean set out to accomplish this his freshmen year. On February 8th, at a game against Boothbay, Jarrett sunk a three pointer and earned his 1,000 points. It may sound easy to some, but it is not. If you think it is, you probably never played the game.

A player doesn't score that many points by accident. There is a lot of work that goes into it, and avoiding injuries is a big factor. A player needs to be a consistent scorer for at least two years, if not three.

Bottom line, any player that has scored 1,000 or more points didn't do it by accident. Jarrett put in countless hours shooting the basketball and joins the ranks of just a few Telstar alumni with their name on the banner. Jarrett, Telstar is proud of you!

A brief rundown on the track season

"The 2017 season featured a great combination of old and new. For the old, our Senior and upperclassmen leaders scored wins throughout the season and earning their way to the State meet at Dover Foxcroft. For the young, we added some powerful Freshmen and kept our high powered Sophomores who all represented themselves well at the State meet." -Coach Dave Leclerc

We have been truly blessed to have a son as great as you. Watching you grow to become an amazing young man has been a very wonderful journey. You are and will always be treasured. With an abundance of love and pride - Mom & Dad

Taylor

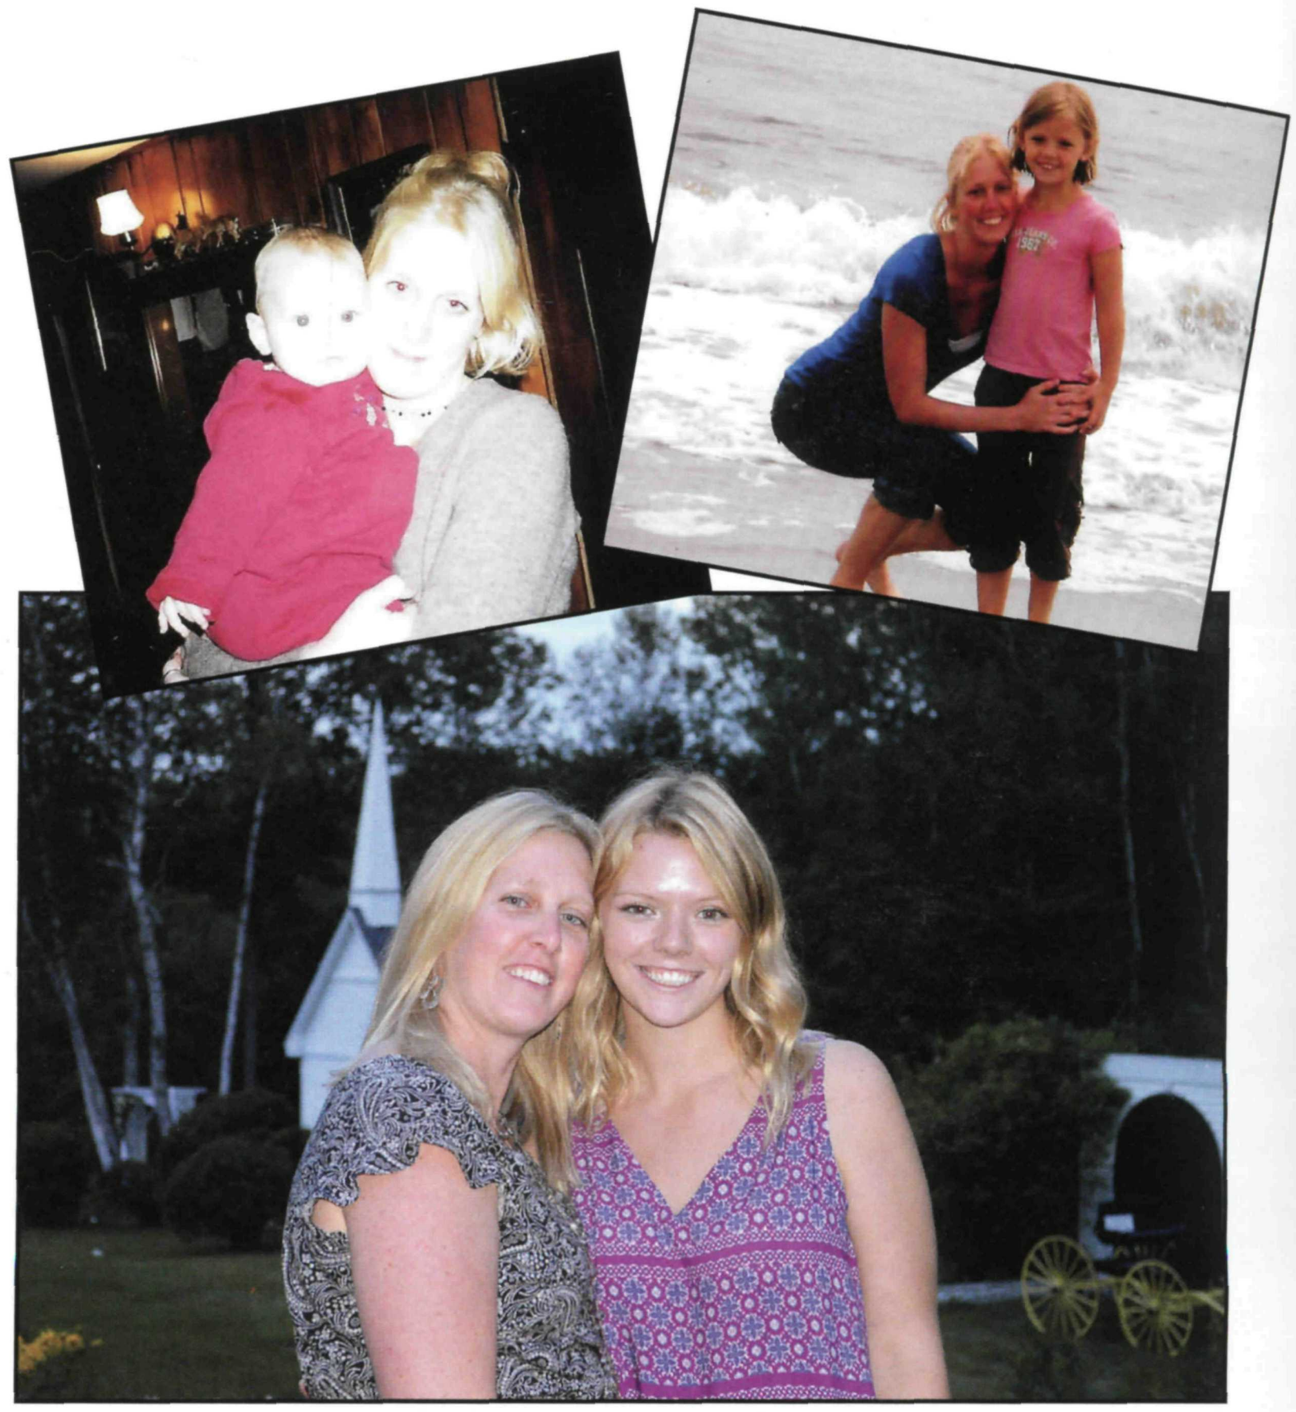

Congratulations Taylor! It doesn't seem like it was very long ago, when I was putting you on the bus for your first day of school. As the time has gone by, I have seen your dedication to school, and your grades. I am very proud of you today, and always. I miss the skip days we spent together & all the fun things we would do. Keep up the great work, I love you.

Love, Dad

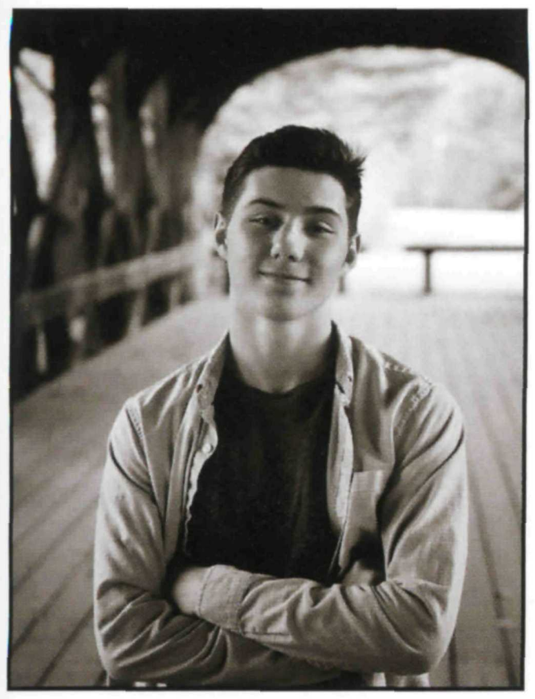

TAY.

From the day you were born, you've always held a special place in my heart.
I am so grateful for the closeness we share.
Precious memories of the little girl you were, are blended with bright images of the beautiful woman you've become. You fill my heart with so much love, sunshine, & pride. I cannot wait to see the places you'll go. Remember, I am always here for you, & could not be any prouder!!

Love You Always,
Carrie

Shawn Mador

We are very proud of the young man you have become.
Stay honest and kind and dream big!

Congratulations !

Love Mom & Dad

Savannah Merrill

Congratulations Savannah! I am so proud of all that you have accomplished. "Wherever you choose to go, go with all your heart."
Love Mom

Taylor

Words cannot begin to describe how proud I am of you! As a parent you envision a perfect world, with a loving, tolerant society..but unfortunately this is not the reality we live. But, how better to change the world we live in, than to raise a loving, caring, conscientious daughter who can move forward, & continue to do good, & make positive changes in all that she touches?
Since Kindergarten you have excelled in everything you put effort into. You continue to seek knowledge, new challenges, & conquer it all very well.
You have grown so much these last few years. Physically, mentally, & emotionally, & you continue to grow & learn everyday..I am so proud of the person you have become, & I am so excited for your future.. I know wholeheartedly...You Taylor Louise Mason..will have an amazing, wonderful, exciting journey in this life!

Love you so much,
Mom

Jarrett Bean

Jarrett,
We closed our eyes for but a moment and suddenly a man stood where a boy use to be. We may not carry you in our arms but we will always carry you in our hearts. You have given us so many reasons to be proud of the man you have become, but the proudest moment for us is telling others that you are our son.
We love you,
Mom and Dad (Walt)

YOU WILL ALWAYS BE OUR SUPERMAN!

Yearbook Staff: We capture the moments

The yearbook staff works hard to document the moments that matter here at Telstar High School. From Homecoming events, the daily routines, sporting events, to Winter Carnival week; they take the photos and get the story.

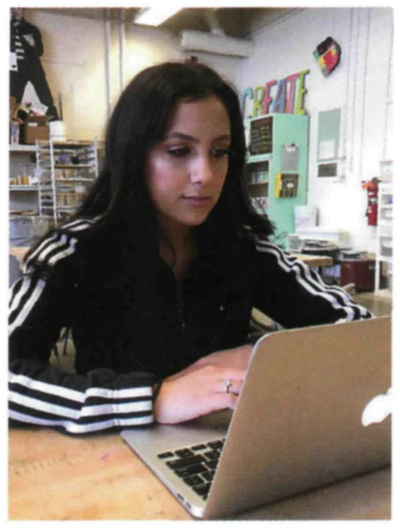

The work doesn't stop after taking the photos. The staff designs the pages and thinks about how to visually communicate Telstar High School's story.

Thank you to the yearbook staff for your hardwork!
